Professional Experience

Web Developer Consultant

RevMyHome - Remote (USA)

Nov 2025 – Present

- Developed and customized a WordPress real estate website, focusing on responsive design, usability, and content structure.
- Implemented page layouts, theme customizations, responsive adjustments, and content organization based on client requirements.
- Worked directly with the client through an iterative workflow, using a staging environment to test and validate changes before deployment.
- Configured WordPress security measures and addressed website maintenance and technical issues as needed.

WordPress Content Manager
Food Scouting / Food Republik - Remote (Spain)
Mar 2026 – Present

- Manage and publish international trade fair reports using WordPress, custom post types, custom fields, and Elementor.
- Structure and optimize content, images, and category organization according to client requirements.
- Maintain consistent formatting and content quality across multiple reports while communicating directly with the client through Fiverr.

Web Developer & Technical Operations Support
NET DATA HN - On-site, Honduras
Sep 2023 – Apr 2024

- Contributed to the redesign and maintenance of the company's institutional WordPress website, applying responsive design and usability principles.
- Supported technical operations for connectivity projects, coordinating with field technicians, NOC teams, and clients.
- Collected, validated, and documented technical information for service reports and institutional projects.

E-commerce Administrator / Shopify Web Support
Mi Patria - On-site, Honduras
Feb 2022 – Dec 2022

- Managed product information, pricing, inventory, and content updates for a Shopify e-commerce store.
- Optimized product pages and content to improve usability and customer experience.
- Provided technical and customer support through email and social media.
- Collaborated with sales and marketing teams on website and content improvements.

Projects

Task Manager Web App
JavaScript · HTML · CSS · LocalStorage

- Developed a browser-based task management application using vanilla JavaScript, enabling users to create, complete, and delete tasks dynamically.
- Implemented DOM manipulation, event handling, and LocalStorage integration to persist data across browser sessions.
- Focused on clean code structure and basic state management to simulate real-world frontend logic.

Personal Branding Website - Electronics Engineer
WordPress · Elementor · Responsive Design

- Designed and developed a professional personal branding website for an electronics engineer, focused on clean presentation and usability.
- Customized theme, layout, and content structure using WordPress and Elementor, delivering a fully responsive and client-ready site.

Café Miel - Landing Page
HTML · CSS · JavaScript · Responsive Design

- Built a complete landing page for a fictional café concept using pure HTML, CSS, and JavaScript no templates or frameworks.
- Includes hero section, services grid, contact form with JS validation, smooth scroll navigation, and full mobile responsiveness. Deployed on Netlify.

WordPress Child Theme Practice Project
WordPress · PHP · CSS · ACF

- Built a custom child theme using Twenty Twenty-Four as the parent theme.
- Implemented custom templates, CSS variables, WordPress hooks and filters.
- Created a custom post type with ACF fields and customized archive, single, and 404 templates.

Education

Associate degree in Web Application Development
CEUTEC
Jun 2020 - Jan 2025
